

# Strictureplasty types

## Heineke-Mikulicz

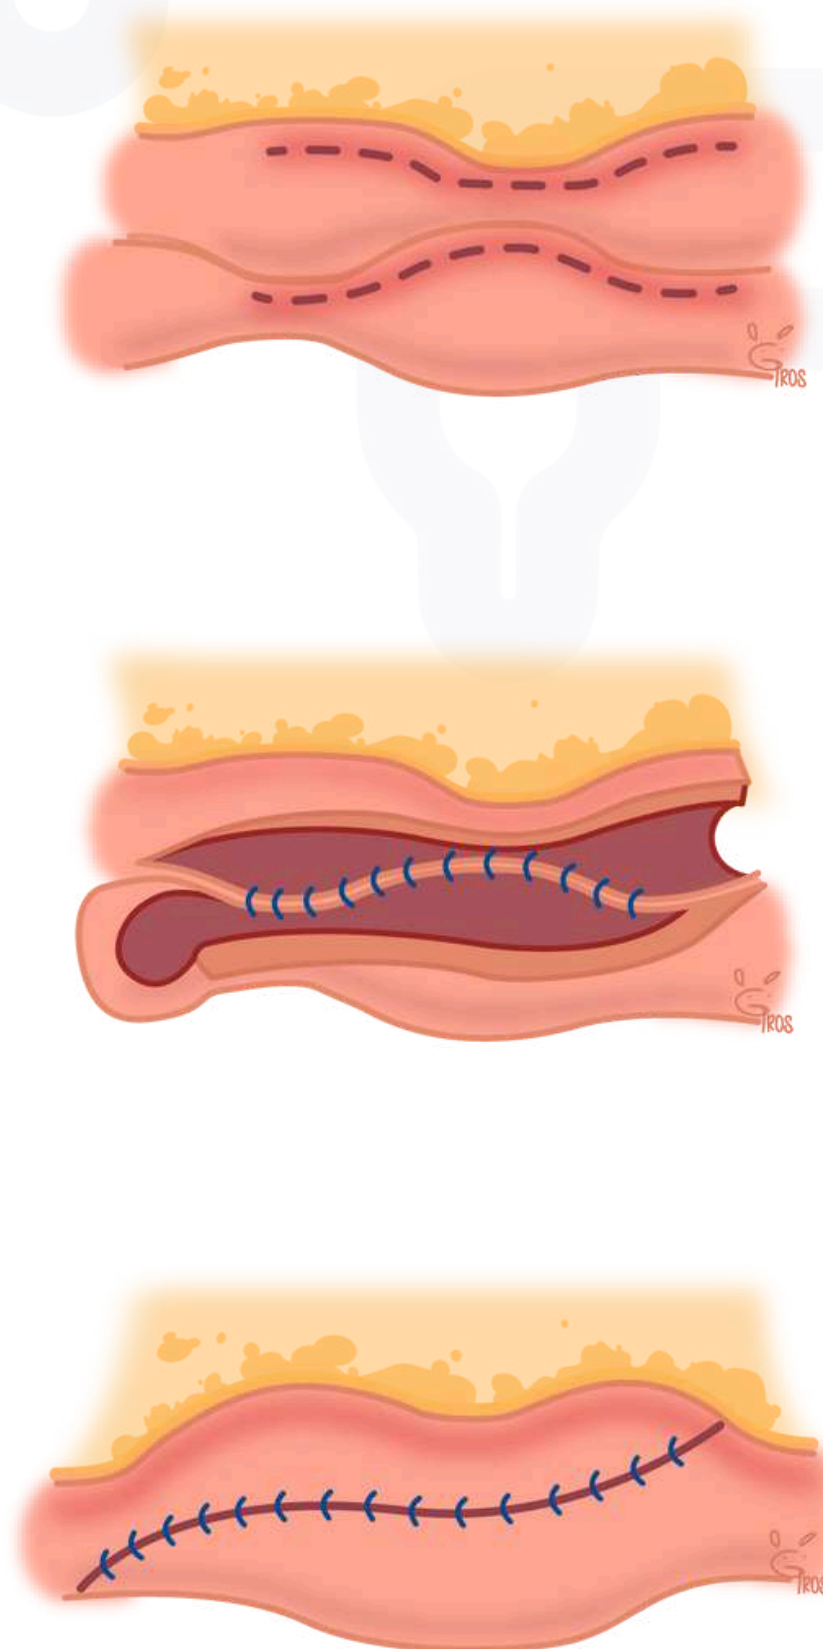

Short strictures (<10cm).  
Longitudinal incision  
along the stricture, closed  
transversely

## Finney

Longer strictures (10-20cm),  
side-to-side anastomosis,  
forming a wider lumen

## Michelassi

Very long/multiple closely spaced  
strictures. Side-to-side anastomosis  
along the length of the stricture,  
preserving bowel length & function
